Remarkable Submarine Boat.

It is now believed that John P. Holto the scrap heap and be replaced by held. A nervous, irritable mother, often on the verge of hysteries, is unfit to care for children; it ruins a child's disposition and reacts upon herself. The trouble between children and their mothers too often is due to the fact that the mother has some female weakness, and she is entirely unfit to bear the strain upon her nerves that governing children involves; it is impossible for her to do anything calmly.

The ills of women act like a firebrand upon the nerveus, consequently ninetenths of the nervous prostration, nervous despondency. "the blues," aleepleasness, and nervous irritability of women arise from some derangement of the female organism.

Do you experience fits of depression with restlessness, alternating with extreme irritability? Are your spirits easily affected, so that one minute you laugh, and the next minute you laugh, and the next minute you feel like crying?

Do you feel something like a ball rising in your throat and threatening to choke you; all the senses perverted, morbidly sensitive to light and sound; pain in the ovaries, and especially between the shoulders; bearing down pains; nervous dyspepsis, and almost continually cross and snappy?

If so, your nerves are in a shattered condition, and you are threatened with nervous prostration.

Proof is monumental that nothing in the world is better for nervous prostration.

Proof is monumental that nothing in the world is better for nervous prostration.

DEATH OF IRVING

GREAT ENGINH ACTOR FOR-

LAST CURTAIN IS RUNG DOWN

Appears on the Stage in Full Health and Vigor.-Goes to His Hotel and Succumbs to an Attack of Syncope. -Expires Without a Word.

London - The English - speaking world has suffered an irreparable loss by the sudden death to night of Sir Henry Irving, who was universally regarded as the most representative Eng-lish actor of contemporary times. Sir Henry died literally in harness. He was giving a series of farewell per-

He was giving a series of farewell per-formances in the English provinces and this week was playing an engage-ment at Bradford, appearing in several favorite roles. Thursday he presented "King Rene's Daughter," and "The Bells" and seemed to be in excellent health, taking the exhausting part of Matthias in the latter play with all the

vigor of youth.

To-night before an enthusiastic audience he portrayed one of his most char-acteristically intellectual parts, the title role in his own stage adaptation of Lord Tennyson's "Becket," with marked success.

After the performance Sir Henry re-turned to the hotel, reaching his rooms at 11:30 o'clock, when it was observed

that he was in great pain.

Physicians were immediately sum ned, but before they could arrive Sir Henry was seized with an attack of syncope and expired within a few minutes, without having uttered a word, in the presence of Bram Stoker, who had been his immediate manager for many years, and a few other intimate friends. The event caused the greatest pain and consternation among the members of the company.

The Associated Press to night re-ceived the following telegram from

"Very terrible news; Sir Henry Irving had an attack of syncope after returning from the theater to the hotel to-night and died suddenly."

To the last moment of his life Sir Henry Irving's heart was in the work to which he had devoted his career the raising of the standard of his art. Wednesday he was entertained at luncheon in the Bradford town hall, at which the mayor presented him an address from his admirers.

In replying to the address Sir Henry spoke of himself as one of the sands of whose life were fast running out, but no one then present had the slightest idea that the end would come so soon.

He proceeded in his reply to elo-quently advocate the establishment of land, the inventor of a successful theaters by municipalities, "because," type of submarine boats, has improved he said, "I believe that by this means upon his invention to such an extent the standard of the true drama, as disthat the submarines thus far built by tinguished from miscellaneous enter-the nations will have to be consigned tainments, would be successfully up-

"Money is spent like water for all the new boat which has stood a num-ber of remarkable tests. The new boat kinds of-philanthropic and educational attains an average speed of twenty objects," he continued, "but who knots when submerged and can in case among you ever dreams of endowing of necessity make thirty knots an the theater? I am sure the time will thour, thus exceeding the speed of the come when you will regard the theater fastest cruiser. The old boats did well has necessary to a liberal education and to attain a speed of nine knots an hour be prepared to consider any reasonable and will from now on be regarded more suggestions for the extension of its

PEACE TREATY SIGNED.

THIN BLOOD-WEAK NERVES. Russian-Japanese War is Officially One Follows the Other, but Dr. Wil-

produces faulty or difficult motion, trembling, cramps and even paralysis. Writers, telegraphers, tailors and seams stresses are among the classes most threatened in this way with the loss of their power to earn a living. The following instance shows that nerve power may be recovered after it seems entirely low, if the right means are taken. Mrs. O. S. Blacksten, of No. 584 North Bowman street, Mansfield, Ohio, says:

"For years my hands would become an namb at times that I would drop anything I attempted to lift. Later they became so bad that I could not sew any longer, and at last I could scarcely do anything at all with my hands. At night the pricking sensations would

treaty at Tokio. A cablegram was im-mediately sent to Spencer Eddy, charge of the American embassy at St. Petersdo anything at all with my hands. At night the pricking sensations would come on worse than ever, and my hands and arms would pain so that I dreaded to go to bed. My family doctor gave me some nerve tablets. They helped me a little, but only for a short time after I had taken them and if I happened to be without them for a day or two I would be as bad as ever or even worse. Finally I got a box of Dr. Williams' Pink Pills and began to take them.

"The result was surprising. By the 8, 1904, with the attack by Togo's fleet upon the Russian ships at Port Arthur, terminated officially to-day, October

Over a Mile a Minute,

New York.-In a driving finish, with the next man only a few seconds behind him, Hemery, of the team of French automobile racers, won the race for the W. K. Vanderbilt, Jr., cup over the Long Island course to-day. Hemery made the distance of 238 miles in 276 minutes clapsed time. George Heath, the American, driving a French car, was second, while Tracy, another American, but not of the French team was third, and Lancia of the Italian team, fourth. Hemery won from Heath by three minutes thirty-two seconds elapsed time.

Germans Want Big Navy.

Berlin.-The disclosures in France of alleged British offers of alliance against Germany are so thoroughly be-lieved here that the powerful Naval League, with its 600,000 members and all the apparatus of agitation, is al-ready moving for a new naval program that shall further increase Germany's defensive resources against Great Britain.

Next tie a rag over head of the bowl to keep in the Now put the pipe into a Glass of

Water, as in picture.
There you have a complete Gasplant for 25 cents.
Touch a match to the Burner—and you'll get a beautiful White Gas-

Of course, this is only an experi-ment, but it shows the wonderful sim-plicity of Acetylene Lighting.

That very simplicity gave Acetylene

Light a setback, at first, It seemed so simple to turn Calcium Carbide into Gas-light that over 600 different kinds of "tanks" and "Acetylene Machines" were invented, patented, and marketed for the purpose, by about as many different

well, the thing to be expected certainly happened!
About 530 of these "Acetylene Machines" had been invented and sold by people who knew more about Timuare than they did about Gas-making.
The "Calcium Carbide" was all right all the time, but 530 of the machines for turning it into Gas were all wrong all the time.

all wrong all the time.

So Acetylene Gas "got a bad name," though it is clear enough now that it never deserved it at any time.

It was like selling Wood Stover to burn Hard Coal in, and then blaming the Coal for not burning.

Lots of things happened to grieve the Owners of these 530 makes of alleged "Acetylene Machines."

But very few accidents occurred from them even in the days of rank experiment and dense ignorance, among, "Generator" Makers.

Of course, a gun will go off unexpectedly, now and then, if the trigger be pulled by a person who "didn't know it was loaded."

But, that's no fault of the Ammunition—is it?

Well, finally the Insurance Companies got after these 530 odd makes of "Acetylene Machines" that wouldn't Acetylate, and the Insurance Board made an investigation of all Generators that were submitted to

Then, out of the 600 odd "Machines" patented only about 70 were "permitted" by the Insurance Board to be used.

Oh, what a howl was there!

By "permitted" I mean that the Insurance Board was willing that any building should be Insured, with-

out extra charge, which used any one of Acetylene Generators it had found safe, and e just as it permitted houses to be piped for C or wired for Electricity, under proper condition. Now, the Insurance Companies ought is whether or not these 70 different makes of A Generators were absolutely Safe to use.

Because, they have to pay the bills, if F plosion occurs, from any one of the Acety authorize.

plosion occurs, from any one of the ators they authorize.

And, here's a proof of their good Though there are now Two Acetylene Light in America Fires from it in one year, Kerosene and Gasoline.

There have also been 40 1707 Fires from City Gas, and Besides these there have Sun's rays, But,—only four That shows how careful in its examination of Acetyle "permitting" only the 70 makes fixion, out of the 600 experiment the market.

Well,—the boom in Acetylens
